Good afternoon Richard,

Enclosed are comments for the latest Traffic Impact Study (TIS) of the subject project. Please note that there are still a number of open comments since updated TIS, SWPPP and Concept plans were not provided with this submission.

Regarding signal, we agree with the proposal to relocate the site access driveway opposite to Bailey Road with a new traffic signal since warrants are met. Additionally, please send us an analysis to see if the signal works better coordinated or free. If a coordinated one is installed, time based coordination can be used.

Please send us an updated TIS with other requested documents addressing the outstanding comments and let us know if you have any questions.

Regards,

Zakia R. Alam, P.E.

Zakia –

Please find attached letter and associated analysis related to the potential of aligning the site access driveway opposite Bailey Road.

Please let me know if you have any questions or require any additional information.

Thanks,
Rich.

Good morning Richard,

Thank you for letting us know.

Relocation of the site driveway across the Baily Road, will reduce the distance between the potential 4 leg intersection and the high school driveway. In that case, coordinated signal may be required. Therefore, NYSDOT requests including analysis of warrant 6 in the updated signal warrant analysis.

Thanking,

Zakia R. Alam
